

becker marine systems

Nehmen Sie das Ruder selbst in die Hand!

Founded in 1946, Becker Marine Systems is today's technology leader for shipyard independent high-performance rudder systems and propulsion improving methods for ships. There are more than 8,000 seagoing ships with our innovation in service. As a family business with over 250 employees in Germany, China, Singapore, Korea, Norway and the USA, we are constantly growing and investing in our future.

We are looking for someone to strengthen our branch office in Japan at the earliest possible date:

Service-Technician/QM-Inspector (m/f) (Graduate Engineer/Technician/Master)

Your Duties:

- Execution of controlling and acceptance of maritime equipment and components according to specified quality standards at the manufacturing companies that we have commissioned
- Inspecting the equipment and components for conformity with national and international standards and classification requirements
- Supervision of the correction of quality discrepancies
- Advising the responsible people with the implementation of orders and/or the manufacturing process
- Professional communication internal and external in reporting as well as documentation
- Frequent business trips within Europe and Asia

Your Profile:

- You have successfully finished academic studies in the technical area of steel building, mechanical engineering or welding technology or have finished a vocational training as technician/master with 3 years of relevant work experience in quality management or ship building fabrication.
- You are familiar with the requirements of DIN EN ISO 9001:2008 as well as setting up quality management systems.
- Experience with the planning, execution and assessment of quality controlling and inspections round your profile up.
- You have a confident behavior, are assertive and are able to figure out practicable solutions under pressure
- Ideally you have completed a training in NDT-Method of Testing.
- A good command of English (spoken and written), experience with MS-Office applications and a willingness to travel are all requirements of this position.

If you feel up to these interesting and demanding duties, we would enjoy receiving your complete application documents including your **desired salary as well as the your earliest starting date**, preferably in electronic form to:
